

Customer Success in Salesforce

Independent Project: Use Salesforce to Support Customers

Baiba Zvaigzne]

Project Overview

1

Task 1: Create New Cases

2

Task 2: Create a Knowledge Base

3

Task 3: Create Knowledge Articles

4

Task 4: Business Case Analysis

Task 1: Create New Cases

Insert a screenshot of each of the 3 new cases you've just created. Make sure to show the Case Details and Contact Details sections in your screenshot so that the Subject, Description, Status, Priority, and associated Contact are all visible.

Step 1: The new case you created for **Rebecca Kim**.

Step 2: The new case you created for **Denise Choi**.

Step 3: The second new case you created for **Denise Choi**.

Task 2: Create a Knowledge Base

Insert a screenshot of the Knowledge Base you created showing the data category group and the data categories within it.

Task 2: Create a Knowledge Base

Task 3: Create Knowledge Articles

Insert a screenshot on the following slide of the “Published Articles” list view showing you have created and published the six specified articles. Note that you may have to refresh your page for them all to appear in this list view.

Task 3: Create Knowledge Articles

Knowledge						New	Publish
Recently Viewed ▾

	☐ Article Title ▾	Summary ▾	Article Number ▾	Published Date ▾	Publication St...		
1	☐ Dashboards		000001005	10/15/2025, 4:43 AM	Published		
2	☐ Social Media Conversations		000001006	10/15/2025, 4:42 AM	Published		
3	☐ Metrics		000001004	10/15/2025, 4:39 AM	Published		
4	☐ Channel Integration		000001001	10/15/2025, 4:37 AM	Published		
5	☐ Post Scheduling and Content Calendars		000001003	10/15/2025, 4:38 AM	Published		
6	☐ Channel Selection		000001002	10/15/2025, 4:38 AM	Published		

Task 4: Business Case Analysis

In a short paragraph, describe how creating cases and knowledge base articles in Salesforce helps SimplySocial more efficiently and effectively support their customers. In your description, include:

- The overall purpose of cases and knowledge bases
- The major steps you took to create cases and a knowledge base
- How SimplySocial benefits from using cases and knowledge bases

Task 4: Business Case Analysis

Creating cases and knowledge base articles in Salesforce helps SimplySocial deliver faster and more consistent customer support. Cases allow the team to track and manage customer issues from start to resolution, ensuring nothing gets missed.

I created cases by logging customer requests, assigning them to the right support agents, and updating their status through each stage. Then, I built a knowledge base by documenting common solutions and best practices, so agents and customers can quickly find answers to recurring issues. This setup helps SimplySocial reduce response times, improve service quality, and empower customers with self-service options—making the whole support process more efficient and effective.

You have reached the end of this **Project!**

This is the end of this Independent Project! Great job completing all these tasks in Salesforce. Make sure you download a copy of this deck for your portfolio.
