Part A, Task 3: Use Opportunity Kanban

Insert a screenshot showing the updated opportunity Kanban board on the following slide. Make sure it displays which opportunity stages both the FoodStars.org and Yaloo Search opportunities are in as well as the estimated amounts attached to both.

Part A, Task 3: Use Opportunity Kanban

Part A, Task 4: Business Case Analysis

In a short paragraph, describe how updating opportunity records, progressing opportunities through stages, and using opportunity Kanban in Salesforce would help SimplySocial's team of account executives sell better and more efficiently. In your description, include:

- The overall purpose of opportunity records, opportunity stages, and opportunity Kanban
- The steps you took to help the AE organize and progress opportunities through the stages.
- How a company like SimplySocial would benefit from using opportunities and opportunity stages

Part A, Task 4: Business Case Analysis

Updating opportunity records, progressing them through stages, and using the opportunity Kanban view in Salesforce helps SimplySocial's account executives stay organized and focused on deals that matter most. Opportunity records capture all key details about each potential sale, while stages show where each deal stands in the sales process—from prospecting to closed won or lost. By helping the AE update records, define clear stages, and visualize progress in the Kanban board, I made it easier to track deal movement, spot bottlenecks, and prioritize follow-ups. For SimplySocial, this means better forecasting, fewer missed opportunities, and a more efficient, data-driven sales process that improves collaboration and boosts overall sales performance.

You have reached the end of **Part A!**

Make sure your screenshots are embedded in the appropriate slides before moving on. Note that you will complete Part B of this Independent Project at the end of Week 4.
